

May 17, 1971

Mr. N. S. Muccilli, Plant Manager  
National Lead Metals Division  
1050 State Street, P. O. Box 831  
Perth Amboy, New Jersey 08862

Dear Mr. Muccilli:

This is to acknowledge receipt of your correspondence dated April 14, 1971 relative to your application for certification to operate a solid waste disposal facility adjacent to your plant in Perth Amboy, New Jersey.

We have reviewed your supplemental information which accompanied your correspondence dated March 1, 1971. You have indicated that the steel drums are cleaned and stored in the area prior to their removal which occurs approximately four times annually by a contractor. The old paint cans are periodically covered with furnace slag and crushed electric storage battery cases. As you know a representative of this Bureau inspected this operation on December 8, 1970. His report indicated that the drums were being dumped and partially crushed and that the covering of the crushed drums and paint cans was very minimal and with crushed battery casings. You assured our representative that every effort will be made to conform with the regulations which we enforce.

Under the circumstances it is recommended that you complete the attached supplemental engineering data form and return it to this office. Please note that this form should be signed by a licensed professional engineer who may be engaged by your corporation in such a capacity. We also request that an official

Mr. N. S. Muccilli, Plant Manager

May 17, 1971

tax map be submitted indicating the lands held by the corporation particularly that section whereon the landfill operation is conducted. The last page of the supplemental engineering data form should be used as a guide in the submission of additional information which will assist this office in making a determination relative to your certification.

Should you have any further questions regarding this matter, please do not hesitate to contact us. We shall hold your application pending receipt of this additional information.

Very truly yours,

Arthur W. Price, Chief  
Bureau of Solid Waste Management
